PROFESSIONAL SUMMARY

Product design leader with 10 years of experience across fintech, gaming, e-commerce and enterprise software. Leads design strategy, establishes design processes and partners with product and business teams from discovery through launch. Experience includes AI-assisted workflows, design systems and conversion optimisation, with measurable outcomes in growth, retention and operational efficiency.

PROFESSIONAL EXPERIENCE

Design Strategist and Consultant | PVX Partners

Oct 2024 - Present

- Guide product design strategy, prioritisation, quality and end-to-end execution for a user acquisition (UA) financing platform.
- Designed AI-assisted due diligence workflows that reduced turnaround time by 25%.
- Translate funding requests, cohort performance, loan servicing and repayments into intuitive client workflows; partner with product and business stakeholders to validate requirements, financial logic and implementation quality.

Founding Product and Design Strategist | AskMyGuru

Jul 2025 - Aug 2026

- Created an AI-powered Vedic wellness platform that reached 2M+ downloads with a lean team.
- Increased depositor funnel conversion by 100% in 8 months; Shipped a subscription flow that contributed to ~50% of overall revenue
- Developed short- and medium-form Vedic content that improved return on ad spend (D1 ROAS ~70%).

Product Design Manager | Multiply, a Pidilite Venture

Nov 2023 - Jul 2025

- Led product experience and UX strategy for a platform serving woodworking contractors and interior designers.
- Designed information architecture and revenue funnels for a platform that reached 70K+ woodworking contractors with 14% month-one retention.
- Integrated Lean UX into Agile development processes, improving scrum team velocity.

Lead Product Designer | MPL

Sep 2019 - Sep 2023

- Defined design processes centred on user insights and data; delivered a gaming asset marketplace that reached 1 million transactions within 7 months of launch.
- Designed trust-building features that increased the share of promoters from 24.6% to 31.7% in Net Promoter Score (NPS) measurement.
- Improved game registration by 12% through user-flow optimisation; designed responsible gaming journeys to support player wellbeing.

Senior Product Designer | AJIO

Jun 2018 - Aug 2019

- Conducted research and designed in-store kiosk interfaces deployed across 550+ Reliance Trends stores in 160 cities.
- Conceptualised navigation integrating AJIO LUXE into the main app to support luxury product discovery and upselling.
- Reduced product returns by 12% by integrating replacement flows into the return and exchange experience.

Product Designer | Happay by MakeMyTrip

May 2016 - May 2018

- Established the product design function, design processes and delivery systems for an enterprise expense management platform.
- Designed information architecture and product flows supporting onboarding of clients including Adani Group, PwC and Oxford University Press.
- Created a scalable design system to improve visual consistency and reduce frontend development timelines; conducted qualitative research.
